Art Unit: 3653

REASONS FOR ALLOWANCE

1. These comments are made in addition to the remarks in Applicant's specification and arguments, concerning the manner in which the invention distinguishes from the art discussed therein. The Examiner relies in part on the allowable subject matter of parent issued patent (US 6,196,371 B1).

Regarding Independent Claim 68, the Examiner notes that the prior art does not disclose or suggest the claimed combination including particularly a coin counting machine having a coin input region configured to receive a plurality of randomly oriented coins, a coin sensor with a magnetic core having opposing end portions defining a gap through which coins move, said sensor further having a high frequency winding and a low frequency winding coupled to the core, with the high frequency winding closer to at least one of the end portions than the low frequency winding, said coin counting machine further having a communication facility operably connected to a processing device configured to receive coin data from the coin sensor. The prior art lacks this structure or anything equivalent to it.

Independent Claim 76 discloses substantially the same apparatus, except that a voucher output facility that outputs a redeemable voucher replaces the communication facility of Claim 68.

The closest prior art includes Leibu et al (US 5,579,887) and Okada (US 4,556,140). Leibu discloses a core (24) that does not have two ends that form a gap.

Okada discloses a core (6) having two ends that form a gap with a high frequency coil

(8) (supplied with AC current) and a low frequency coil (9), but each coil is the same distance from at least one of the ends.

Additionally, the prior art submitted by Applicant in the IDS of 11/17/06 which is in the English language is found to not read on Applicant's claims allowed 8/17/06. These references also do not exhibit a core that has two ends forming a gap with a high frequency winding closer to at least one of the end portions than the low frequency winding.

The foregoing is an Examiner's Statement of Reasons for Allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

- 2. The information disclosure statement (IDS) submitted on 11/17/06 was filed along with RCE documents filed on the same date. Accordingly, the information disclosure statement has been considered by the examiner. Some references submitted by Applicant in this IDS have not been considered because neither an adequate statement of relevance, nor an adequate translation of said prior art documents has been made of record in accordance with 37 CFR 1.98.
- 3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey A. Shapiro whose telephone number is
